

Empathy Map

Project Name: Rising Water – AI-Based Flood Prediction System

User Persona

Name: Ravi Kumar

Age: 34

Occupation: Farmer

Location: Flood-prone rural village

THINKS

- Wants early flood warnings.
- Wants to protect crops and family.
- Needs reliable predictions.
- Wants enough time to evacuate.

FEELS

- Fear during heavy rainfall.
- Stress about losing income.
- Anxiety for family safety.
- Hope for better technology.

SEES

- Rivers overflowing.
- Heavy rainfall.
- Dam water release.
- Flood news on TV and mobile.

HEARS

- Government flood alerts.
- Weather forecasts.
- Village announcements.

- Advice from neighbors.

SAYS 🗣️

- "I wish I knew before the flood."
- "My crops are my livelihood."
- "We need accurate flood prediction."

DOES 🧑

- Checks weather updates.
- Watches river levels.
- Moves valuables to safe places.
- Helps neighbors during floods.

PAINS 😞

- Crop damage.
- Property loss.
- Financial problems.
- Transportation issues.
- Late flood warnings.

GAINS 😊

- Early flood prediction.
- Better preparation.
- Reduced financial losses.
- Increased safety.
- Better decision-making.

Conclusion

The Rising Water Flood Prediction System provides early flood risk predictions using Machine Learning. It helps farmers, citizens, and authorities prepare in advance, reducing damage and improving safety.
