

Value Proposition Canvas

Project

Rising Water – AI-Based Flood Prediction System

Customer Jobs

- Receive early flood warnings
- Protect family, crops and property
- Plan evacuation before flooding
- Monitor flood risk easily

Customer Pains

- Inaccurate or late alerts
- Loss of crops and property
- Financial damage
- Lack of reliable prediction tools

Customer Gains

- Timely flood prediction
- Reduced losses
- Better preparedness
- Increased safety

Products & Services

Machine Learning based web application that predicts flood probability from environmental factors.

Pain Relievers

- Provides early prediction
- Supports informed decisions
- Easy-to-use web interface
- Fast prediction results

Gain Creators

- Improves disaster preparedness
- Helps protect lives and property
- Supports government and citizens
- Encourages proactive action
