

Non-Functional Requirements

Project: Rising Water – AI-Based Flood Prediction System

ID	Category	Requirement
NFR-1	Performance	Prediction should complete within 3 seconds.
NFR-2	Usability	Simple and user-friendly interface.
NFR-3	Reliability	System should produce consistent results.
NFR-4	Availability	Application should be available whenever required.
NFR-5	Scalability	Can be extended with new datasets and models.
NFR-6	Security	Validate user input and prevent invalid data.
NFR-7	Maintainability	Code should be modular and easy to update.
NFR-8	Compatibility	Runs on modern web browsers and Windows.
NFR-9	Accuracy	Provide reliable flood probability predictions.
NFR-10	Portability	Easy to deploy on different systems.

Conclusion

These non-functional requirements ensure the Rising Water system is secure, reliable, accurate, and easy to use.
