

Use Case Diagram

Project: Rising Water – AI-Based Flood Prediction System

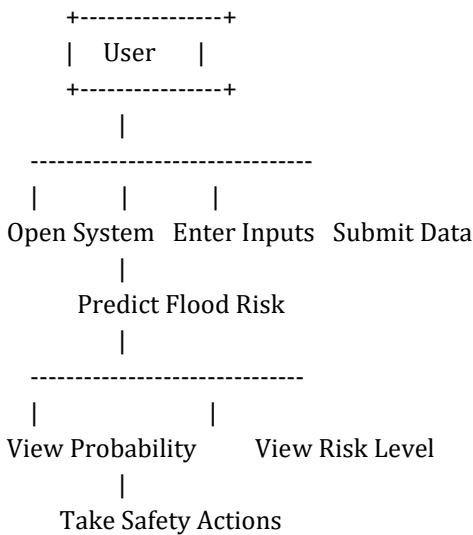

Primary Actor

User

Use Cases

- Open Flood Prediction System
- Enter 20 Environmental Parameters
- Submit Prediction Request
- View Flood Probability
- View Risk Level (Low/Medium/High)
- Make Safety Decisions

Simple Use Case Diagram (Text Representation)

Description

The user opens the application, enters all required flood-related parameters, submits the form, and the system predicts flood probability and displays the corresponding risk level.
