

User Stories

Project: Rising Water – AI-Based Flood Prediction System

Story ID	User Story
US-1	As a farmer, I want to know the flood risk early so that I can protect my crops.
US-2	As a resident, I want to receive a flood prediction so that I can prepare my family.
US-3	As a disaster management officer, I want accurate flood predictions to improve emergency planning.
US-4	As a user, I want a simple interface so that I can use the system easily.
US-5	As a researcher, I want consistent prediction results to evaluate flood patterns.
US-6	As a government official, I want flood risk information to allocate resources effectively.
US-7	As a student, I want to understand flood prediction using machine learning.
US-8	As an NGO volunteer, I want early warnings so I can help vulnerable communities.

Acceptance Criteria

- All required inputs must be entered.
- Prediction should be displayed successfully.
- Risk level should be shown as Low, Medium, or High.
- The application should respond without errors.
